diptyqueキャンドルをご購入いただきありがとうございます。ハンドメイドによるこの贅沢な製品の製造の秘密と、最良の状態でお使いいただくためのアドバイスをご紹介します。

感谢您选购diptyque香氛蜡烛。请参照此说明卡建议的使用方法，以达到最佳使用效果。

Through its collection of scented candles, diptyque seeks to preserve the universal memory of nature's scents.

diptyque understands how to reveal, with simplicity, the olfactory richness of raw materials, and to reproduce as faithfully as possible the many scents of a dreamed about, pristine nature.

Candle after candle, an exceptional herbarium of scents has been created - a unique palette of nearly fifty candles. Each person can, by combining two of them, compose his or her own olfactory landscape.

diptyque invites you on a journey of the senses to an imaginary garden, where all facets of the natural world meet.

diptyque, perfumer and artist

A UNIQUE KNOW-HOW

diptyque candles are the product of luxury craftsmanship.

Fine, rare and precious, the raw materials that compose each perfume are selected with the utmost care.

Because each fragrance concentrate reacts to heat in a different way, meticulous care is taken to strike the right balance between the concentrate, the wax and the wick. To achieve a perfect diffusion of the perfume, each candle benefits from a unique blend of high-quality waxes, with wick material and diameter selected for optimal combustion.

It takes two days to make each candle and eight separate processes, most of which are still done by hand.

A range of accessories has been specially designed to care for the candles and ensure they are enjoyed throughout their life: wick trimmer, snuffer, stands, lid and candle holders.

PRECAUTIONS AND INSTRUCTIONS

To ensure the safety, quality and durability of your scented candle, please follow the instructions below:

- The first time you use your diptyque candle, let it burn for at least two to three hours until all the wax on the surface has become liquid. This will prevent the wax from tunneling down around the wick.
- The candle may smoke slightly as heat from the flame causes the liquid wax to rise up the wick.
- For your candle to burn evenly, make sure the wick is centered and trim it with the wick trimmer (ideal length of 3mm to 5mm).
- Do not light the candle when less than 5mm of wax is left at the bottom or when the wick tripod is visible.
- To avoid spilling the liquid wax, use a snuffer or lid to put out the candle.
- Never leave a burning candle unattended.
- Do not place a lit candle in a draught or in direct contact with a surface that has a fine finish and is not heat resistant.
- Never move a candle that is lit or in a liquid state.
- Keep out of reach of children and pets. Do not place near curtains.
