

DIFFUSEUR DE
PARFUM D'INTÉRIEUR

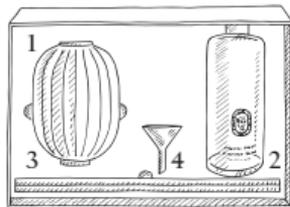

diptyque
paris

Designed to last and endlessly rechargeable, this home fragrance diffuser is a genuine decorative object. Its oval shape and refined contours adopt the emblematic codes of the Maison. Seen through the faceted glass sides and their playful reflections of light, the fine rattan stems are multiplied to create a prismatic effect. Glass, fragrance and rattan become as one, breathing life and poetry into your home. Conceived to scent large spaces, the diffuser is based on a simple but effective diffusion process: plant capillary action. Just insert the natural rattan reeds into the glass container: they will absorb the fragrance concentrate and diffuse it into the atmosphere. Once the concentrate has been exhausted, the diffuser can be refilled over and over with any one of the scents in the range.

CONTENTS OF SET

1. Glass container.
2. Bottle containing the fragrance concentrate.
Glass bottle and aluminium cap are recyclable.
3. 6 rattan reeds - natural, renewable and eco-friendly.
Minor imperfections in the rattan are inherent in its traditional handcrafted production.
4. Funnel (please keep for further use in the future).

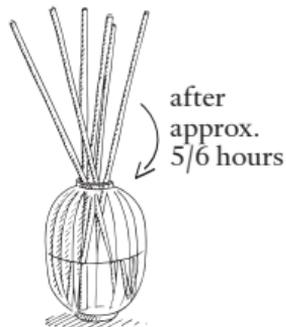

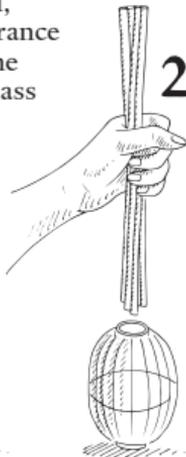

SET-UP

- I.** Using the funnel, pour all the fragrance concentrate in the bottle into the glass container.

- 2.** Insert the rattan reeds.

- 3.** When using for the first time, allow the rattan reeds to absorb the fragrance concentrate for 5 to 6 hours, then drain them off into the inside of the glass container and turn them upside down. This will cause diffusion to start.

USE AND RECOMMENDATIONS

- The home fragrance diffuser is designed for long-term use and can be refilled over and over again. Each refill has a lifespan of at least 3 months.
- Place the article on a flat surface where it will not be exposed to humidity.
- Avoid prolonged exposure to temperatures above 40°C.
- The home fragrance diffuser is recommended for scenting large areas.
- To stimulate the diffusion process, drain the reeds off inside the glass, then remove them and turn them upside down. Repeat this action multiple times until the fragrance concentrate has fully evaporated.
- After handling the rattan reeds, rinse your hands with clean water and soap.
- If the diffusion becomes too strong, its intensity can be adjusted by removing reeds until the desired level has been achieved.
- Because the fragrance concentrate contains natural raw materials, its colour may vary slightly over time without affecting the fragrance.
- The fragrance is highly concentrated, and can cause irritation if it comes into contact with the skin. Keep out of reach of children and animals.
- The home fragrance diffuser is only intended for use with diptyque fragrance refills.

CARE INSTRUCTIONS

- Using a non-abrasive cloth, remove any dust that may have settled on the article.
- You can switch to a different fragrance concentrate between two successive uses. Using a non-abrasive sponge, rinse the glass container in clean water with soap, then pour in the new refill.
- The 6 rattan reeds must be replaced with each new refill (new reeds are sold with the fragrance refill).
